

R&D

The Cold Business Unit has a specific R&D department dedicated to the developing needs of commercial refrigeration appliances.

The department works in synergy with several Institutes and Universities to maintain the hedge of knowledge and support its customers in a fast changing marketplace. In its fully equipped laboratories new products and technologies are tested with particular attention to performance and energy saving innovations.

Every new product and material is approved through severe life testing in the most critical working conditions to guarantee extended performance and reliability.

Come and see our solutions.

WORLDWIDE LOCAL SUPPLIER

Zoppas Industries
Heating Element Technologies

● Head quarters

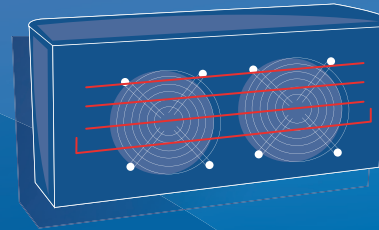

● Manufacturing facilities

Zoppas Industries
Heating Element Technologies

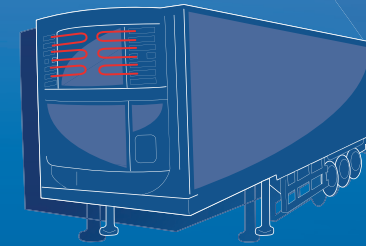

FREEZING/SEASONING AND STORAGE

Air-coolers for freezing processes, cold rooms, seasoning chambers.

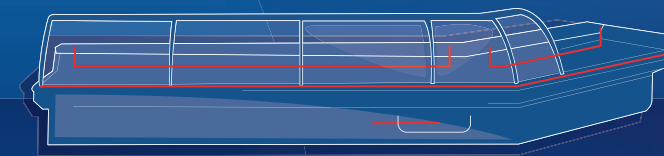

REFRIGERATED TRANSPORT

Refrigerating units for Trucks and Containers.

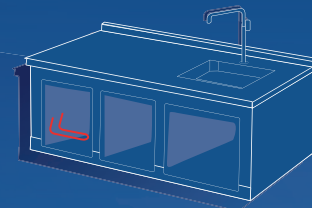

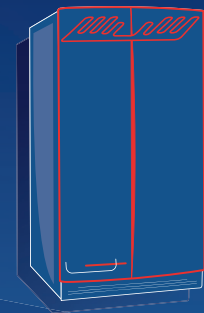

RETAIL

Display cabinets, refrigerated counters

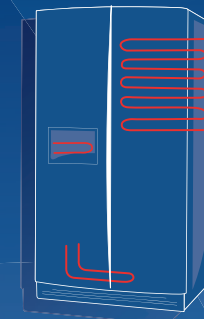

FOOD-SERVICE EQUIPMENT

Reach-in cabinets, under-the-counter refrigerators, display cases, blast chillers, bread proving booths.

DOMESTIC

Direct cooling refrigerators, no-frost refrigerators.

Rica Cold Business Unit

RICA is a specialised division of the Zoppas Industries Group. Over the years RICA has developed electric heating element technologies to meet the requirements of customers worldwide for different applications in industrial and commercial markets.

The Cold Business Unit represents RICA focus in the design and production of electric heating solutions for the specific needs of the commercial refrigeration market. Long established experience, technical knowledge, complete product range and continuous investment in Research and Development enables the Cold Business Unit to supply the right solution to all application requirements.

The quality and reliability of RICA products, coupled with full customer service dedication and global manufacturing presence, makes the Cold Business Unit the perfect partner in the refrigeration market worldwide.

No Frost heater

Tubular defrost

Spiral finned tubular

Rectangular finned tubular

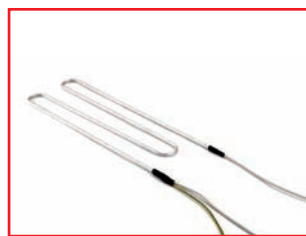

Monotube

Silicon and PVC cables

Aluminium foils

Aluminium tubes

Compressor crankcase cable

Compressor crankcase cartridge

PTC evaporating pan

Plug-in evaporating pan

Silicon etched foils

Polyester etched foils
