CUSTOM THERMAL SOLUTIONS FOR MEDICAL DIAGNOSTIC DEVICES AND IMAGING SYSTEMS

Zoppas Industries
Heating Element Technologies

Thermal control for your medical or system device is critical for the comfort and safety of the patient, as well as the performance of the device itself. Rica's experienced design and engineering staff can provide products and ideas presenting the optimum thermal solution.

Rica, being part of Zoppas Industries, is the world leader in the manufacture of heating technologies such as flexible heaters, cartridge and cable heaters with integrated sensing and mechanical assemblies. Flexible heating elements include silicone, polyimide, polyester and mica constructions. Cartridges are high density heaters that offer different power ratings and different finishes.

All Rica heating solutions are custom designed providing the best in performance whilst meeting the customer's requirement.

Rica is the only approved Kapton® heater supplier for the European Space Agency. Just imagine what Rica can do for you here on Earth!
