

# LET'S SHAPE HEAT

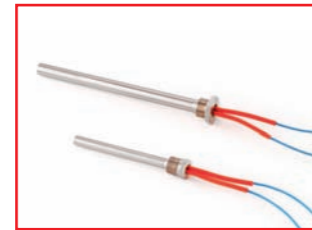

The **Plastic Business Unit** provides a complete range of heating elements and functional assemblies. The list includes:

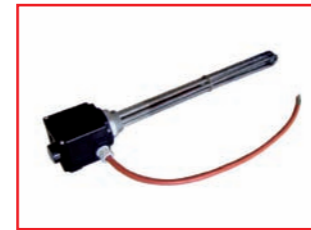

Heaters for pellet stoves and pellet burners

Heating elements for pellet stoves

PTC heating elements for wall-mounted gas boilers

Heating elements for boilers

Heating elements in ceramics for radiators

Heating elements for radiators

Heating elements for towel rails

Heating cables

Water regulation thermostats for towel rails

## RICA'S CONSTANT ATTENTION TO THE MARKET

The constant evolution of Rica's concept of supply has led the **Electronic Business Unit** to develop, in close collaboration with Italian designers and architects, avant-garde products fulfilling all the market's requests. Together with the **Plastic Business Unit**, Rica offers a wide range of elements for integrated domestic heating mainly used on radiators, towel rails and pellet stoves.

### DESIGN & ERGONOMICS common characteristics

Rica range provides elegant products that are functional and easy to use. These are indispensable characteristics in any working environment.

### HYGIENE quick and immediate

Rica plastic covers are produced from the highest quality plastics that are very easy to maintain.

### STRENGTH for a long working life

Rica products are made of the highest quality materials which are durable and can withstand heavy performance stress.

### CERTIFICATIONS safety and guarantee

All Rica products are in compliance with EN 60335 standards (each according to their related field). All components and products are RoHS compliance.

## THE DELIGHT OF CONTROL

The **Electronic Business Unit** specialises in the design and production of heating control systems. The list includes:

Electronic thermostats for radiators and towel rails

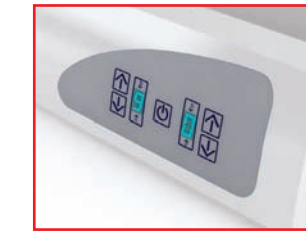

Electronic controls for water mattresses

Electronics for whirlpool baths

Electronics for central air conditioning (industrial and residential)

Electronic controls for catering (fryers, fry tops)

Electronic controls for saunas

Electronic controls for pellet stoves

Electronic controls for pellet burners
