

## Installation instructions

Note: The mirror should not be cut, drilled or altered in any way.

### INSTALLATION:

- The mirror de-misting panels designed for glass mirrors only
- Ensure the mirror is larger than the mirror de-misting panel
- Carefully peel off self-adhesive backing from the mirror de-misting panels and place directly onto the back of the mirror making sure there are no creases or bubbles.
- Allow for heat expansion when mounting the mirror i.e. do not butt tiles hard against the mirror and allow a silicone expansion gap.
- If using through hole fittings, screws must be placed centrally in a rubber sleeve.
- Corner brackets must have clearance to allow for expansion.
- If fitting mirror to wall using adhesive, the adhesive should be placed around the edge of the mirror (min. 40 mm gap between panel and edge of mirror). Do not put adhesive onto the mirror de-misting panel.
- Do not cut, drill or weaken the mirror de-misting panel
- Wiring should be carried out in accordance with IEE regulations.

NOTE: All electrical connections should be undertaken by a qualified electrician.
